EDUCATION

University at Albany, SUNY

Albany, NY

B.S. Computer Science, Minor in Informatics, GPA: 3.98/4.0 | Dean's List

Jan 2025 – May 2027

- **Coursework:** Human-Computer Interaction, Software Engineering, Data Structures, Algorithms, Computer Architecture, Systems Fundamentals, Programming Language Design & Implementation, Discrete Probability, Linear Algebra
- **In Progress (Fall 2026):** Bayesian Data Analysis, Database Systems

SKILLS

Product & Program: Agile/Scrum, PRD Authoring, Product Lifecycle Management, Roadmapping, Stakeholder Alignment, Cross-Functional Leadership

Research & Design: UX Research, Contextual Inquiry, Thematic Coding, Survey Design, Likert Analysis, Figma (High-Fidelity), Universal Design, WCAG Accessibility

NLP / ML: BERTopic, BAAI/bge-m3 Embeddings, UMAP, HDBSCAN, Llama 3 (Ollama), CUDA Memory Management

Technical: Python, JavaScript, Java, SQL, Flask, REST APIs, React, Node.js, MongoDB, Git, Airtable

Certifications: IRB Human Subjects Research | WCAG Accessibility | Google Project Management Professional | Intro to Software PM (U of Alberta)

EXPERIENCE

Undergraduate Research Fellow: SURP

Albany, NY

University at Albany | Advisor: Prof. Amreetta Chatterjee

Summer 2026

- Led the NLP track of a two-track HCI study: built a pipeline filtering **371K** Reddit posts into a **2,296-post** corpus analyzing student mental health discourse using **BERTopic** + **BAAI/bge-m3**; contributed to a parallel IRB-compliant survey study on AI-mediated collaboration and cognitive offloading.
- Coded Likert-scale composites from **143** survey respondents through thematic analysis, surfacing disruption patterns during AI-assisted group problem-solving; findings support product design guidelines for AI collaboration tools.
- Hand-coded **252** Reddit posts through open coding (**764** code instances), assigning a primary theme per post and grouping themes by wellbeing dimension.
- Co-authoring a **CSCW** manuscript on the corpus findings (in preparation).
- Designed and facilitated a hands-on NLP workshop for beginner researchers, authoring all live Python teaching scripts covering transformer embeddings, UMAP, and HDBSCAN clustering.

Student Assistant: Web Development Intern & Product Lead

Albany, NY

Community & Public Service Program (CPSP), University at Albany

Feb 2026 – Present

- Owned end-to-end product delivery of a volunteer directory designed for **1,200+ students**: defined requirements, built prototype (HTML, CSS, JS, Airtable API), and managed stakeholder alignment.
- Pitched to UAlbany's Office of Communications & Marketing; secured enterprise engineering buy-in and migration into the official **Drupal CMS**; consulting with lead developers on architecture and UI capacity tracking.
- Drove **WCAG 2.1** compliance across 5 courses via WAVE audits, improving accessibility for 500+ users; received Certificate of Leadership for digital accessibility impact.

Founder & President

Albany, NY

UAlbany International Students Network (UISN)

Jan 2026 – Present

- Built a 0→1 student organization from scratch: authored the constitution, recruited a 15-member board, secured official university recognition and ISSS sponsorship within one semester.
- Defined and executed community programming roadmap in partnership with ISSS and Counseling Services; co-launched an International Ambassador Program with ISSS Director.

Student Assistant: Financial Aid & Student Services

Albany, NY

University at Albany

May 2025 – Present

- Primary stakeholder contact for **100+** weekly cross-departmental inquiries; cut average resolution time **15%** and held a **92%+** satisfaction rate (Cisco contact center reporting) under FERPA compliance.

PROJECTS

MediTrust: Digital Pharmacist App | Figma, UX Research, Universal Design | Prototype

- Ran end-to-end UX research → contextual inquiries with **5** elderly users, competitive analysis (WebMD, Medisafe), and a high-fidelity Figma prototype usability-tested with **4** additional participants; identified *After-Hours pill misidentification* as the core safety gap.
- Designed a multimodal scan/voice interface with binary Safe/Unsafe verification, large touch targets, and one-tap SOS applying Universal Design principles.

LumiTrack: Course Roadmap Planner | Python, Flask, JavaScript, vis.js | Live

- Engineered a **DAG**-based prerequisite validation engine (Kahn's Algorithm, $O(V+E)$) exposed through a REST API, with interactive course graphs rendered via vis.js; scoped and shipped the MVP solo.

CoreCompute: CS Learning Platform | React, Node.js, Express, MongoDB, JWT | GitHub

- Led architecture and built the admin portal for a team-built full-stack MERN learning platform featuring DAG-based roadmaps, a knowledge gap analyzer, gamified progress tracking, and JWT/bcrypt authentication (UAlbany ICSI 418Y).

Latibule: Reflective Journal App | JavaScript, SVG, LocalStorage | Live

- Designed a behavior-change journaling interface where sustained writing drives visible SVG tree growth, with a custom scoring system rewarding consistency over volume; real-time rendering and localStorage persistence in a single deployable file.
